

OFFICE OF
INSURANCE COMMISSIONER

June 24th, 2024

TO: All Property & Casualty insurers with fire loss claims due to the August 2023 Gray Fire and Oregon Road Fires

RE: Required data call relating to pre-loss coverage limits and post-loss claim payouts.

I, Insurance Commissioner Mike Kreidler, directs the National Association of Insurance Commissioners (NAIC) to issue the Washington Gray and Oregon Road wildfire Property & Casualty data call and collect the data on my behalf. Therefore, pursuant to [RCW 48.02.060](#), I hereby instruct each authorized property & casualty insurer that has a loss associated with the August 2023 Gray Fire and Oregon Road Fire to submit two fully completed worksheets to the NAIC Regulatory Data Collection filing services. I additionally request all excess and surplus line companies that may be affected to voluntarily respond to this data call so the state of Washington has a complete picture of the wildfire loss on our residents.

Pursuant to [SSB 5806 \(Chapter 123, Laws of 2024\)](#), the data collected from authorized and unauthorized companies is confidential by law and privileged, are not subject to public disclosure requests under chapter 42.56 RCW and are not subject to subpoena directed to the Commissioner or the NAIC. This does not prohibit the Commissioner from preparing and publishing reports or other documents from the data received, as long as the data in the report is in the aggregate form and does not allow the identification of information relating to any one company.

In order to access the data collection software, all company contacts who plan to submit data on behalf of the company or group will need to send an email to help@naic.org requesting that they be assigned the correct roles. Please review the attached instructions for further directions.

Sincerely,

A handwritten signature in blue ink that reads "Mike Kreidler".

Mike Kreidler,
Insurance Commissioner
