| Comment(s) or question(s) | Gender affirming care is life saving and so vital for transgender people who want it. Like my teen. I fully support insurance coverage of gender affirming care. Hormones and doctors visits add up. We fear we won't be able to help her pay for the life changing operations she wants to have when she turns 18. And we are privileged with good jobs and a house to live in. We fully support our teen to be who she is. Lots of trans youth don't have that. That's why this is so important. Gender affirming care is health care! |
